

Turn Noise Into Foresight

The Challenge

Today's security leaders must anticipate-not just react to-emerging threats. From geopolitical unrest to insider risks, organizations struggle to translate overwhelming data into timely action.

The Solution

Holtec Intelligence Services fuse global monitoring, open source intelligence (OSINT), and the ARES AVERT™ predictive simulation platform to deliver real-time situational awareness and risk forecasting for enterprise and critical infrastructure clients.

Core Capabilities

Global Risk Monitoring

Continuous tracking of political unrest, natural disasters, and cyber events.

Geospatial Intelligence

Visual dashboards and threat heat maps to guide decisions.

Social & Dark Web OSINT

Early detection of chatter, protests, and data exposure

AVERT™ Predictive Modeling

Scenario simulations for crisis planning and resource allocation.

Deployment Roadmap

1. **Assessment & Discovery** – Map environment, assets, and compliance drivers.
2. **Integration & Calibration** – Connect systems, tune detection logic, and eliminate false positives.
3. **Operational Launch** – Continuous monitoring with automated containment and human validation.
4. **Continuous Evolution** – Quarterly red-blue simulations, threat hunting, and executive reporting.

Turn Noise Into Foresight

What We Deliver

Why It Matters

Actionable Intelligence	From noise to insight—decision-grade reporting
Integrated AVERT™ Simulation	Anticipate risk before it manifests
Executive Protection Coverage	Route security, event monitoring, and crisis alerts
Regulatory-Ready Reporting	Supports insurance, compliance, and board governance
Nuclear-Grade Standards	Built on DOE and DHS-validated methodologies and safety act certified technology.
Unified Ecosystem	Integrates intelligence, automation, and live readiness—not siloed services.
Consultative Expertise	Assessment-first approach guided by operators trained under federal standards.
Proven Roi	Quantifiable improvements in detection, coverage, and cost efficiency.

Who We Serve

- CSOs
- Risk officers
- Emergency managers in energy
- Manufacturing
- Transportation
- Government sectors
