HOLTEC SECURITY INTERNATIONAL

# HSI SOC Advantage (SOCaaS)

*Mission-Critical Security. Delivered as a Service.*

Cyber threats evolve faster than most organizations can respond. Building and staffing an internal SOC costs millions and yet still leaves blind spots. HSI closes those gaps with a fully managed SOC that unifies cyber, physical, and operational technology (OT) defense in one continuously improving ecosystem.

## *SOC Advantage (SOC-as-a-Service)*

**Your command center—delivered as a service.**

AI-driven threat detection, robotics integration, and human expertise merge in a 24×7 operations environment built to nuclear standards, now available for enterprise scale.

- Unified monitoring across legacy systems (300+ connectors)
- AI-assisted detection and event correlation
- Autonomous patrol integration (drones, ground robotics)
- 24×7 staffing by NRC-cleared analysts

| *What WeDeliver* | *Why It Matters* |
|---|---|
| **Nuclear-Grade Standards** | Built on DOE and DHS-validated methodologies and SAFETY Act-certified technology. |
| **Unified Ecosystem** | Integrates intelligence, automation, and live readiness—not siloed services. |
| **Consultative Expertise** | Assessment-first approach guided by operators trained under federal standards. |
| **Proven ROI** | Quantifiable improvements in detection, coverage, and cost efficiency. |

## Real World Impact

**Cleaner, more reliable alerts**
fewer false alarms

**Reduce deployment time**
using existing infrastructure

**Reduce overtime costs**
via autonomous patrol deployment

**Schedule a site evaluation or readiness consultation.**

HOLTEC SECURITY INTERNATIONAL

# HSI SOC Advantage (SOCaaS)

*Mission-Critical Security. Delivered as a Service.*

## Deployment Roadmap

1. **Assessment & Discovery** – Map environment, assets, and compliance drivers.

2. **Integration & Calibration** – Connect systems, tune detection logic, and eliminate false positives.

3. **Operational Launch** – Continuous monitoring with automated containment and human validation.

4. **Continuous Evolution** – Quarterly red-blue simulations, threat hunting, and executive reporting.

## Service Tiers

| Service Tiers | Essential | Advanced | Premium (AI-Enhanced) |
|---|---|---|---|
| 24×7 Monitoring & Alerting | ✓ | ✓ | ✓ |
| Compliance Reporting | ✓ | ✓ | ✓ |
| Managed Detection & Response | | ✓ | ✓ |
| AI-Powered Analytics | | | ✓ |
| Automated Response | | Guided | Fully Automated |
| Threat Hunting | Basic | Proactive | AI-Driven |
| Executive Reporting | Monthly | Weekly | Real-time quarterly reviews |

## Who We Serve

Critical infrastructure operators, utilities, healthcare networks, and defense contractors requiring 24×7 resilience, automation, and compliance under NERC CIP, ISO 27001, HIPAA, and CMMC mandates.

## The HSI Difference

- Nuclear-Grade Standards, Commercial Flexibility
- Trusted Operators – Former law enforcement, military, and cyber specialists
- Zero Disruption Protocols – Seamless integration with ongoing operations
- Measurable ROI – Tangible performance metrics and cost savings
